Course Name – RDi Workshop
Course Code – R02CA

Overview
This course consists of an interactive lecture covering the features of Rational Developer for System i (RDi). Labs and libraries are provided for you to execute the labs from your desktop and your i5.

Description
The course is designed to introduce developers to RDi. The lectures and labs show developers how use RDi to develop and maintain i5 applications and how it can be more productive than the traditional development tools.

Topics Covered
-Connections
-Subsystem and filters
-create objects
-LPEX editor to edit i5 programs
-verify, compile and execute programs
-Run commands
-Manage i5 objects
-Work with i5 jobs
-Access the IFS
-Debug i5 applications
-Application Diagrams

Duration – 1 day

Requirements
RDi installed on the students desktop.
Ability to connect from the students desktop to your i5 server for the labs.
Ability to restore the libraries required for the labs to your i5 server.
